Education

Oriental Institute of Science and Technology, Bhopal

B-Tech in Mechanical Engineering

Aug 2019 - Mar 2023

CGPA : 7.50

Graphite Higher Secondary School, Mandideep

Intermediate (CBSC)

Mar. 2018 - Mar. 2019

Percent : 59

Career objective

A motivated Mechanical Engineering graduate seeking an opportunity to start my career in mechanical design and CAD modelling, utilising SolidWorks, 3D modelling, and assembly skills while continuously learning and growing in a professional environment.

Experience

Self-Projects | SOLIDWORKS (*Self Learning & Projects*)

Jan 2025 - Present

- Designed 3D parts and assemblies using SOLIDWORKS, Created 2D manufacturing drawings with GD&T.
- Developed sheet metal components including bends, flanges, and flat patterns.
- Modelled engine components and mechanical assemblies.
- Followed manufacturing-ready design practices and Converted CAD files into GLB / GLTF formats for visualisation.

Projects

Knuckle joint –

Software: AutoCAD 3D

Description:

- Modelled all knuckle joint components using AutoCAD 3D Modelling with precise dimensions based on standard mechanical design principles.
- Improved skills in mechanical assemblies, design intent, and CAD best practices.

Two cylinder engine –

Software: Solidworks

Description:

- Modelled all major engine components using SolidWorks, including cylinders, pistons, crankshaft, and connecting rods.
- Assembled components with accurate mechanical mates to simulate real engine motion.
- Verified piston–crank mechanism movement for smooth operation.
- Created exploded views and assembly drawings for clear visualisation.
- Enhanced skills in mechanical assemblies, motion understanding, and CAD design.

Technical Skills

CAD Software : Solidworks (part modelling, assembly, modelling, 2-D drawings).

Mechanical design : Machine elements design, knuckle joint, two cylinder engine.

Assembly design : Mechanical mates, Sub assemblies, motion analysis (basic).

Drafting and detailing : Engineering drawings, assembly drawings, bill of materials.

Sheet metal design : Sheet metal parts, bends, flanges, flat pattern development.
